

BECAUSE THERE'S NO GOOD TIME FOR DOWNTIME

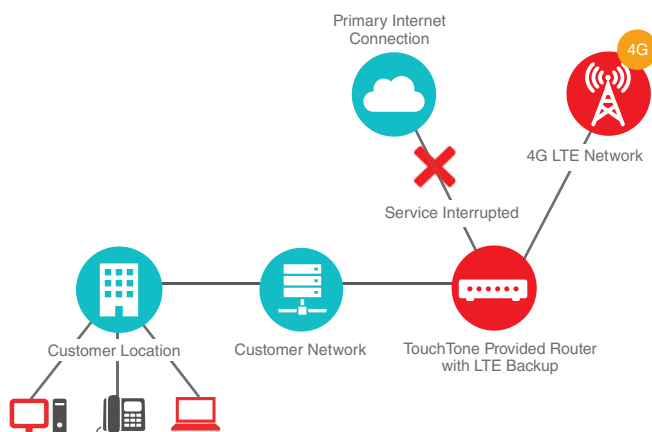

OPEN

NATIONWIDE WIRELESS 4G LTE FAILOVER & BACKUP

Because there is no good time for downtime

TouchTone's wireless backup solution ensures that business communications have an automatic, cost effective backup in the event the primary connection is lost. In case of an outage, business critical traffic is automatically rerouted to 4G LTE connectivity to avoid service disruptions.

- Cost effective alternative to wireline backup solutions
- Flexible plan options ranging from Pay-As-You-Go to Unlimited, with the ability to share usage across plans
- Bring your own equipment or choose one of TouchTone's fully certified routers from brands such as Adtran, Cradlepoint, and DataRemote
- Supports private or public connectivity - VPN options, including fully managed solutions available

TouchTone's flexible 4G wireless data plans can also be used as a primary connection for IoT applications in any area including:

- Aerospace
- Agriculture
- Asset Tracking
- ATMs
- Backup/Failover
- Construction
- ECO Monitoring
- Finance
- First Responders
- Healthcare
- Industrial
- Marketing
- Medical Monitoring
- Research Applications
- Residential
- Retail - Point of Sales (POS) and Kiosks
- Smart Billboards
- Smart Meters
- Transportation
- Utilities
- Vehicle Tracking
- Video Surveillance
