

4G LTE CONNECTIVITY & BACKUP/FAILOVER

TOUCHTONE OFFERS THE TOOLS YOU NEED TO STAY CONNECTED

- ✓ Use TouchTone's 4G LTE solution for primary or backup connectivity
- ✓ Available from all Tier 1 operators
- ✓ Plug and play router for quick deployment
- ✓ 99.99% network availability
- ✓ Enterprise security
- ✓ Supports private or public connectivity - VPN options, including fully managed solutions available

FLEXIBLE PLAN OPTIONS

Choose from a variety of plan options ranging from pay-as-you-go (\$3/month) to unlimited, including the ability to pool data usage.

Bring your own equipment or choose a fully-certified router from brands such as Meraki, Cradlepoint, Accelerated/Digi, and BEC Technologies.

HIGH-SPEED, RELIABLE, AND SECURE 4G LTE CONNECTIVITY FOR ALL YOUR IOT/M2M NEEDS

TouchTone Communications delivers advanced 4G LTE M2M connectivity to help optimize business efficiencies, enhance customer experiences, and reduce the ongoing costs associated with traditional infrastructure.

Use 4G connectivity to collect and monitor data between your office-based systems, remote devices and applications including smart meters, ATMs, kiosks, point-of-sale systems and more.

BECAUSE THERE IS NO GOOD TIME FOR DOWNTIME - AVOID SERVICE DISRUPTIONS IN CASE OF INTERNET OUTAGE

Internet downtime impacts all business, regardless of size. Its effects can result in loss of revenue, reduce employee productivity, create customer dissatisfaction and damage brand reputation. TouchTone's 4G LTE cellular failover solution ensures that business communications have an automatic, cost effective backup in the event that primary connection is lost. In case of an outage, business critical traffic is automatically rerouted to 4G LTE connectivity to avoid service disruptions.

\$39/MO

- 25 MB 4G LTE DATA
