

Unified Communications as a Service (UCaaS)

Stay connected anywhere!

Connect, call, and collaborate from any PC, tablet or smartphone

Help employees communicate and exchange ideas in real-time more easily and effectively, no matter what their location

TouchTone's UCaaS solutions bring together essential real-time communication tools such as instant messaging, presence technology, voice and video calling, multi-party video collaboration, and desktop sharing to enhance business productivity. UCaaS collaboration tools help employees in all environment types including traditional offices, conference rooms, and remote employees access and share information quickly and easily.

Work the way you want and where you want with features such as

Presence Technology

Find the people you need when you need them. Indicator displays status, location, and time zone, allowing you to choose the best way to communicate.

Instant Messaging

Send and receive messages, or initiate a group chat to get answers quickly.

Video Calling

Make or receive video calls on your PC/laptop, video-enabled phone, smartphone and/or tablet from virtually anywhere.

Integrated Business Calling Capabilities

Access business calling features such as auto attendant, hunt groups, call queues, voicemail and call park. Enjoy a seamless user experience in a fully hosted environment, or connect with SIP trunking to existing PBXs.

Multi-Party Voice and Video Collaboration

Hold team meetings and share ideas with consistent experiences across platforms. TouchTone's collaboration solution provides high-quality audio and video sharing so you can meet in confidence.

Screen and Application Sharing

Share documents, presentations, spreadsheets, web pages and other content with your team, partners and customers from any device.
