

Fully Managed and Secure MPLS Virtual Private Network Service

Eliminate the Need for a Single Carrier Solution - Improve Performance while Reducing Costs with TouchTone MPLS

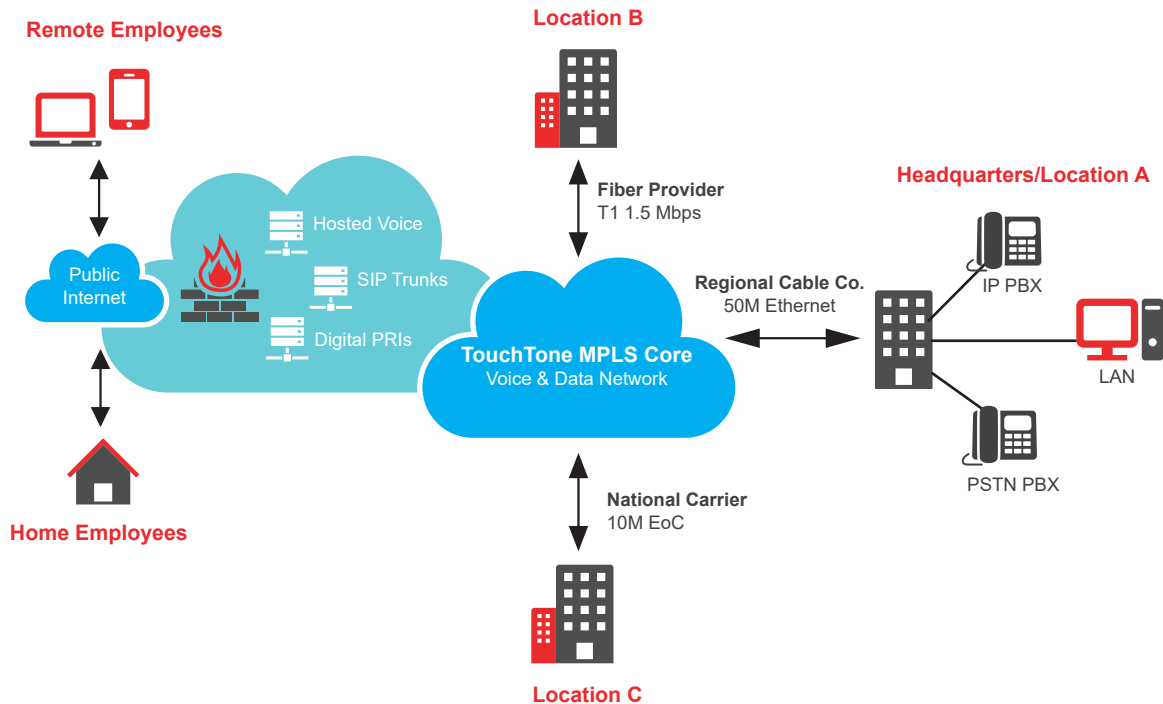

TouchTone Communications understands that network requirements differ from location to location. Our fully meshed MPLS network provides a cost-effective, reliable, and secure way to consolidate all of your business applications and locations onto a single private network. Choose the most cost efficient carrier, access type and speed for each of your individual locations to deliver optimal performance and dependability.

Features & Benefits

- ✓ **Cost Effective and Flexible**
Choose between multiple carriers, access types and speeds based on individual location needs. Bandwidth is available in speeds 1.5 Mbps or higher.
- ✓ **Private and Secure**
TouchTone's MPLS Virtual Private Network (VPN) keeps data safe and securely connects and transfers data between locations with guaranteed dynamic bandwidth. With a remote-access VPN, mobile and remote employees can access company email and files from anywhere and at anytime without risk.
- ✓ **Scalable**
Integrate voice, video, and data into a single IP network with scalable bandwidth options at each site. Enable network access for multiple types of end-users including remote and mobile employees.
- ✓ **Fully Managed**
TouchTone provides a complete end-to-end solution including initial design, installation, configuration, and monitoring.

- ✓ **Geo-Redundant Diversity**
TouchTone provides strict Service Level Agreements (SLAs) to ensure network performance. Points-of-Presence (POPs) using multiple national and regional carriers provide multi-layer geographic redundancy to ensure failproof backup and disaster recovery in case of outage to ensure that your business is running 24/7/365.
- ✓ **Superior Quality and Reliability**
Receive Quality of Service (QoS) SLAs with voice prioritization to ensure that you are receiving overall optimal performance and clear, reliable voice while maximizing bandwidth.
- ✓ **24/7 In-House Support**
With its in-house customer service, engineering, provisioning, and 24/7 NOC, you can count on TouchTone for exceptional service and support.
- ✓ **Proven Experience**
TouchTone Communications has been serving customers since 1993 and prides itself on providing the highest quality service at the most competitive rates, while always maintaining first-class customer service.

TouchTone MPLS Network

Reduce costs while maximizing your network's performance with TouchTone's MPLS VPN Service.
