

## Unified Communications

Connect, call, and collaborate with any phone, smart device, or computer

Help employees exchange ideas and work more efficiently with TouchTone's cloud-based Unified Communications solutions.

Regardless of your company's size, TouchTone's Unified Communication solutions bring together essential real-time communication tools, such as instant messaging, presence technology, voice and video calling, multi-party video collaboration and desktop sharing to enhance business productivity. Unified communication collaboration tools help employees in all environment types including traditional offices, conference rooms, and remote employees access and share information quickly and easily.

### Unified Communication Solutions

- ✓ **Presence Technology**  
Locate and identify a computing device when the user connects to the network, regardless of the device's location.
- ✓ **Instant Messaging**  
Send and receive messages, or initiate a group chat to get answers quickly.
- ✓ **Video Calling**  
Initiate or accept video calls on your laptop, video-enabled phone, smartphone, and tablet for more effective, face-to-face communications.
- ✓ **Integrated Business Calling Capabilities**  
Access business calling features for inbound and outbound calls. Enjoy a seamless user experience in a fully hosted environment, or connect with to an existing PBX using SIP trunking.
- ✓ **Multi-Party Voice and Video Collaboration**  
Bring teams together for impromptu and planned meetings using high definition voice and video. Interact with people at different locations, remote workers, and even external customers, prospects, and partners easily.
- ✓ **Desktop Sharing**  
Simplify partner, prospect, and customer interaction with browser-based desktop sharing. Give instant access to information and share documents quickly and easily.
