Elevate Voice Trust with Branded Calling ID™ (BCID)

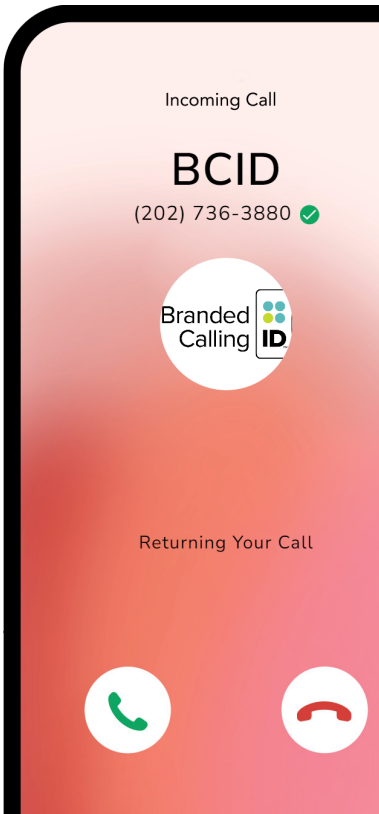

TouchTone is proud to be one of the first Authorized Partners in the Branded Calling ID™ (BCID) ecosystem. With fully verified BCID, businesses can now display authenticated caller information — including **company name, logo, and call reason** — directly on the recipient's mobile screen.

BCID provides a secure, end-to-end calling solution governed by CTIA. It is designed to help verified businesses deliver trusted, recognizable calls that get answered.

As the only industry-led, standards-based Rich Call Data (RCD) solution, BCID enables secure and consistent voice communications across participating U.S. mobile carriers. Built by the telecom industry, it is secure by design and fully aligned with federal compliance standards, including STIR/SHAKEN protocols.

Contact your channel sales manager for additional information, or email partners@touchtone.net.
