

Nationwide 5G Connectivity and Wireless Backup

High-speed, reliable, and secure connectivity

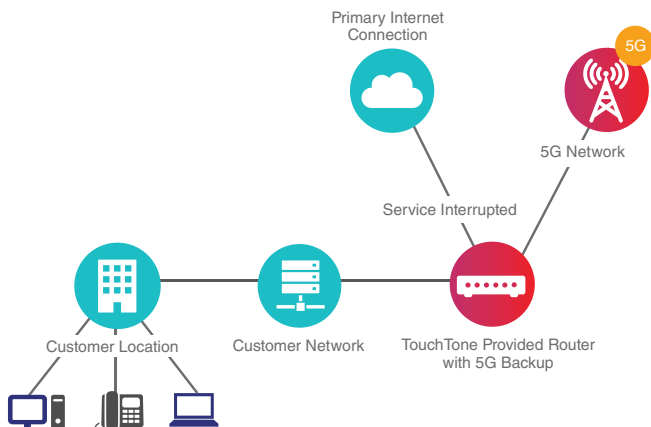

TouchTone Communications delivers advanced 5G connectivity to help optimize business efficiencies, enhance customer experiences, and reduce the ongoing costs associated with traditional infrastructure.

With flexible pricing options and the ability to pool data usage, it's simple to collect and monitor data between your office-based systems, remote devices and applications including smart meters, ATMs, kiosks, point-of-sale systems and more.

- Flexible pricing with the ability to share usage across plans
- Pay-as-you-go plans start at \$3/month
- Speed tiers from 3Mbps - 50Mbps
- Bring your own device or choose one of our fully certified routers from brands such as Meraki, Cradlepoint, Accelerated/Digi and BEC

Because there is no good time for downtime

TouchTone's wireless backup solution ensures that your business communications have an automatic, cost effective temporary backup in the event your primary connection is lost. In case of an outage, business critical traffic is automatically rerouted to 5G connectivity to avoid service disruptions.

TouchTone's flexible wireless data plans are designed for IoT applications in any area including

- Aerospace
- Agriculture
- Asset Tracking
- ATMs
- Backup/Failover
- Construction
- ECO Monitoring
- Finance
- First Responders
