Phone Number Reputation Management

Prevent, identify, and correct phone numbers labeled **Scam** or **Spam** across wireless networks.

The Problem

Wireless carriers have deployed algorithms displaying calls incorrectly as Scam or Spam, impacting live connect rate, customer experience, and brand reputation.

The Solution

Protect the reputation of your phone numbers by establishing your status as a Verified Identity and registering your phone numbers with TouchTone.

This not only protects your calls from being blocked, but provides ongoing monitoring to ensure numbers remain clean.

Any numbers that become labeled as Scam or Spam will be identified In our dashboard and we'll help you get those corrected through our appeals process.

Correct calls negatively labeled as Scam or Spam

Keep your numbers clean

96% Success rate removing labeling across top carriers

1.7 Days needed to correct improper labeling

<1% Chance negative labeling returning once corrected
